# MILE END GOLF CLUB - FROM DRAWING BOARD

Global Ranges, our OGRO 2010 sponsors, have always had a sense of occasion and are particularly proud to announce the completion of their latest project at Mile End Golf Club, just in time for the OGRO Conference and Exhibition on 25th March.

As you can see from the conceptual drawing and photo above, the visualisation has been matched by the execution of the project and despite some of the most severe winter weather in decades the project has been completed in good time and is set to provide an excellent addition to the services offered by Mile End Golf Club.

Paul Dubrow, from Global Ranges is delighted with the new range:

“This was quite a difficult period to co-ordinate the building of such a project, but Richard and his golf club team were very understanding of the issues we faced and we really enjoyed the job. It is very rare for the finished project to look almost

exactly like the model and we wish Mile End all the very best for the grand opening later in the Spring.”

Srixon one-piece balls have been selected and European Golf Machinery supplied most of the range equipment including the bay dividers and a bespoke behind-the-wall dispenser. This was married to a semi-automatic EGM 2000 washer, linked to the elevator, which was in turn linked to the ball dispenser. The dispenser yields balls with membership cards, bar code receipts from the shop and cash. Crossover Technology have supplied their XPOS stock management point of sale system, which integrates with the golf shop, bar and restaurant, as well as all of the range functions we have specified for the ball dispenser. Tony Nelli of EGM said:

“We wish Mile End Golf Club all the very best for the future and trust that they will hugely enjoy operating the new golf range. They were great to work with.”

## GREAT SURFACES FOR ALL SEASONS

Southwest Greens produce, design and install fine synthetic surfaces for golf. From practice tees, putting and target greens, walkways and cart tracks to contoured academy courses for teaching, competition or leisure, Southwest Greens bring you expertise and experience gained on close to 20,000 projects completed worldwide since 1996. Golf clubs and ranges, education and training centres or at home, we'll be delighted to advise on the best installation for your needs and budget. Please contact us, without obligation, for details of our surfaces and services.

*Budding PGA professionals developing their putting skills on a contoured synthetic green designed and installed by Southwest Greens at Gloucestershire's Hartpury College.*

*Southwest Greens' exclusive partnership with Nicklaus Design brings professional expertise to greens' design.*

Richard Thompson, the owner of Mile End is delighted with the way the whole job came together.

“Crossover, European Golf Machinery and, of course, Paul Dubrow from Global Ranges, have all

done a marvellous job. They worked long hours in difficult conditions and really displayed the best attitude to the task at all times. We are very proud of them and the range they have helped to create for us.”
